

Submission guidelines

The Makira Journal of Natural Resource Management and Conservation welcomes high-quality research articles, reviews, and case studies that contribute to the understanding and management of natural resources and conservation. Authors are requested to follow the guidelines below when submitting manuscripts.

1. Submission Process

The Makira Journal of Natural Resource Management and Conservation accepts manuscript submissions exclusively through its online submission system. Authors are required to follow the guidelines below to ensure a smooth submission process. Manuscripts should be submitted electronically via the journal's online submission system at:

<https://makirajournal.org/index.php/jnrm/about/submissions>. Submissions must include:

- **Cover Letter** (explaining the manuscript's significance)
- **Manuscript (Main Document in Word Format)**
- **Figures, Tables, and Supplementary Materials** (as separate files)
- **Author Contributions and Conflict of Interest Statement** (as separate files)

2. Source Files

Kindly ensure that all necessary editable source files are included with each submission and revision. Failure to provide a complete set of editable files may result in your article being excluded from the review process. Manuscripts should be submitted in widely accepted word processing formats such as .docx or LaTeX.

3. ORCID ID

Makira Journal of Natural Resource Management and Conservation highly advise that, corresponding author provides his/her Orchid ID before proceeding with submission.

4. Permissions

Authors submitting manuscripts to the Makira Journal of Natural Resource Management and Conservation must obtain necessary permissions for any third-party content, including previously published figures, tables, images, or text excerpts. Proper attribution must be provided, and written approval from the copyright holder should be submitted with the manuscript. For research involving human participants or animals, ethical approval and informed consent must be secured in compliance with institutional and international guidelines. Any use of proprietary software, unpublished data, or personal communications requires explicit authorization from the relevant sources. Failure to obtain required permissions may result in manuscript rejection or content removal. For inquiries, authors should contact the editorial office before submission.

5. Supplementary Materials

Authors submitting to the Makira Journal of Natural Resource Management and Conservation may include supplementary materials to enhance their manuscript. These materials can include additional datasets, figures, tables, methodological details, videos, or multimedia files that support but are not essential to the main text. All supplementary files should be clearly labeled and referenced within the manuscript. Authors should ensure that these materials adhere to the journal's formatting guidelines and are submitted in widely accessible file formats (e.g., PDF, Excel, JPEG, MP4). Supplementary materials will be published online alongside the article, and it is the authors' responsibility to ensure accuracy and clarity. The journal does not edit or typeset supplementary content, so it should be provided in its final form.

6. Authors' Contributions

All authors involved in the manuscript submitted to the Makira Journal of Natural Resource Management and Conservation must clearly define their individual contributions to ensure transparency and accountability. Contributions should be outlined using the Contributor Roles Taxonomy (**CRedit**) or a similar structured format. Each author's role should be specified in the manuscript, covering aspects such as:

Conceptualization: Developing the research idea and objectives.

Methodology: Designing the research framework, experiments, and data collection process.

Data Collection and Analysis: Gathering, processing, and analyzing the study's data.

Writing – Original Draft: Preparing the first version of the manuscript.

Writing – Review & Editing: Contributing to revisions, proofreading, and manuscript refinement.

Funding Acquisition: Securing financial support for the research.

Supervision: Providing guidance and oversight throughout the research process.

Authors must confirm that all listed contributors have made significant contributions and that no individual has been omitted unfairly. Any changes to authorship must be justified and approved by all involved parties. The corresponding author is responsible for ensuring that all contributions are accurately reported.

7. Responsibility of the Corresponding Author

The corresponding author is responsible for managing all communication between the journal and the co-authors throughout the submission, peer review, and publication process. They must ensure that the manuscript complies with the journal's guidelines, including ethical standards, authorship contributions, and conflict of interest disclosures. The corresponding author is also responsible for submitting the manuscript, responding to reviewer comments, coordinating revisions, and approving the final version before publication. Additionally, they must ensure that

all co-authors have reviewed and agreed to the manuscript's content and that any updates or corrections post-publication are handled promptly.

8. Changes to authorship/Affiliation

Any changes to authorship or affiliation after manuscript submission must be formally requested and justified. This includes adding or removing authors, reordering names, or updating institutional affiliations. The corresponding author must submit a written request to the journal, signed by all affected authors, explaining the reason for the change. No modifications will be allowed after final acceptance unless there are exceptional circumstances. All changes must comply with ethical guidelines to ensure transparency and fairness in authorship attribution.

9. After Acceptance

After acceptance, the manuscript undergoes final proofreading, formatting, and typesetting to ensure accuracy and consistency with the journal's standards. Authors will receive galley proofs for review, where they can identify minor corrections but not make substantial changes to the content. The corresponding author must review and approve the final version within the specified timeframe to avoid publication delays. Once finalized, the article is assigned a DOI (Digital Object Identifier) and published online. Any post-publication corrections or updates must follow the journal's formal revision policy.

10. Post-Publication Policy

The Makira Journal of Natural Resource Management and Conservation is committed to maintaining the accuracy and integrity of published research. If any issues arise after publication, the journal follows a structured process for corrections, retractions, or updates.

- **Corrections:** Minor errors (e.g., typographical mistakes, author affiliation updates) that do not affect the study's findings can be corrected through an **Erratum (author error)** or **Corrigendum (publisher error)** upon request.
- **Retractions:** If serious ethical violations, plagiarism, data fabrication, or major errors compromising research validity are discovered, the article may be **retracted** following COPE (Committee on Publication Ethics) guidelines. A retraction notice will be issued, stating the reason for removal.
- **Addendums & Updates:** If significant additional information emerges that complements the published research, an **addendum** may be issued, linking to the original article.
- **Article Removal:** In rare cases involving legal or ethical concerns, an article may be removed from the journal's website, with a formal notice explaining the reason.

All post-publication changes require approval from the editorial board and, where necessary, consultation with the authors. For any corrections or concerns, authors should contact the journal's editorial office.
